Days Inn 1557 Main St Altavista VA (434) 369-4070

Directions to Lynchburg Livestock Market:

Starting from Lynchburg Airport (Intersection of US-29 and US-460). Head South on US-29 and go 4.5 mi; turn LEFT at the stoplight with McDonald's fast food on your left onto Calohan Road; After Bojangles fast food, Turn Sharp LEFT onto Livestock Road; Travel to end of road and the livestock market will be on your right.

EPDs presented in this catalog are as of 2-20-2026.

Salers Crossed With Any Breed Make \$ense!

Welcome to Southern Eagle Ranch's Generations of Genetics Sale

This marks a milestone for our family, 10 years having a production sale! There are so many people to thank that helped us on this journey. We have offered our very best cattle for your selection and we appreciate your inquiries, bids, and purchases. For us, the fellowship and the growth of your herd with our cattle has meant a lot to us. Take a look at this special offering.

What an exciting time to be in the cattle business!! The cow/calf producer is in the driver's seat. NOW is the time to take advantage and sell those old cows and replace them with newer, modern genetics. Salers (SA'-lair) genetics can modernize and enhance your herd in these good times and beyond. Cross these Salers bulls on any breed and the resultant calves will excel! Put these Salers cows to work in your herd and you will wonder why you didn't do so earlier. This is our ninth year in offering quality Salers cattle, so you can buy with confidence. We welcome guests, Rocky Meadow Farm of Rocky Mount VA, Walnut Hills Holdings of Callaway VA, Sheehe Family Farms of Francisco IN and Heart Bar S Cattle of Prospect OH.

A major step in our herd has been the TOTAL DNA sampling of our brood cows, replacement heifers, and herd sires. This provides HIGHLY accurate EPD values for our cattle. This means you, the buyer, can bid with confidence that these bulls and females will produce as expected. EPDs are enhanced by the DNA analysis of International Genetic Solutions (IGS). This DNA information and performance data are updated on a weekly basis to provide the most up-to-date EPD values. Our EPDs CAN be directly compared to the many breeds associated with IGS. This means the EPDs of a Salers bull can be DIRECTLY COMPARED to a Simmental or Shorthorn or Gelviah bull, for example.

Salers and Salers influenced cattle have predictability in obtaining a live calf at birth, a female to bring in a heavily weaned calf, and a market begging for the carcass a Salers steer offers. WE have made money with these Salers cattle and you will as well.

The Southern Eagle Ranch Family and Guests

Announcements made sale day during the sale will take precedence over printed material in the catalog or other printed material associated with the sale.

Everyone attends the sale at his or her own risk. Southern Eagle Ranch, consignors, or anyone associated with conducting the sale assume no liability whatsoever as to risk or personal injury. Cattle are the liability of the buyer when claimed as "Sold." Every effort will be made by the sale crew to ensure safe handling of the cattle through the sale and loadout process. All guarantees and agreements will be between buyer and consignor.

Trucking - Consignors will work with buyers to help arrange the most economical trucking.

Why are more beef producers using Salers or Salers-influenced cattle??

1. Unassisted Calving
2. Calves are lively at birth
3. Longevity of Salers Cow
4. Better Conception rates
5. More Live Calves = More \$\$\$
